

# TASK 1: USER PERSONA

## Product: AI Study Planner App

| Attribute        | Details                                         |
|------------------|-------------------------------------------------|
| Name             | Swati Sharma                                    |
| Age              | 20 Years                                        |
| Gender           | Female                                          |
| Occupation       | Student                                         |
| Location         | Delhi, India                                    |
| Education        | Undergraduate Student                           |
| Technology Usage | Smartphone, Laptop, AI Tools, Productivity Apps |

Table 1.1 User persona

### 1. Demographic Information

Swati Sharma is a 20-year-old engineering student pursuing her Bachelor's degree in Delhi. She manages college lectures, assignments, projects, examinations, and extracurricular activities. Being a technology-savvy student, she regularly uses smartphones, laptops, online learning platforms, and AI tools to improve her academic performance and productivity.

### 2. Goals and Objectives

#### Goals

- Achieve better academic performance and higher grades.
- Improve time management and productivity.
- Maintain a consistent study routine.
- Reduce stress during examinations.
- Balance academics, internships, and personal activities.

#### Objectives

- Create a personalized study schedule.
- Track daily and weekly study progress.
- Complete assignments before deadlines.
- Receive reminders for important tasks and exams.
- Improve focus and avoid procrastination.

### **3. Psychographic Information**

#### **Interests**

- Artificial Intelligence and Technology
- Online Learning Platforms
- Productivity Applications
- Career Development
- Personal Growth

#### **Personality Traits**

- Goal-Oriented
- Ambitious
- Curious Learner
- Organized
- Responsible

#### **Values**

- Continuous Learning
- Academic Excellence
- Effective Time Management
- Self-Discipline
- Smart Use of Technology

#### **Lifestyle**

Swati prefers digital solutions that simplify her daily activities. She enjoys using applications that help her stay organized, save time, and improve efficiency.

### **4. Behavior and Preferences**

#### **Behavioral Characteristics**

- Uses educational apps regularly.
- Studies using digital resources and online platforms.
- Frequently creates to-do lists and reminders.
- Searches for efficient study methods and productivity techniques.
- Uses AI tools to assist in learning and planning.

## Preferences

- Clean and easy-to-use interface.
- Personalized study recommendations.
- Automatic schedule generation.
- Progress tracking through visual reports.
- Reminder notifications for tasks and deadlines.
- Mobile-friendly application experience.

## 5. User Journey

### • Awareness

Swati discovers the AI Study Planner App through social media advertisements and recommendations from friends.

### • Installation

She downloads and installs the application on her smartphone.

### • Registration

She creates an account and enters her academic details such as subjects, exam dates, and study goals.

### • Personalization

The AI analyzes her information and generates a customized study plan.

### • Daily Usage

She follows the recommended study schedule, receives reminders, and tracks her progress regularly.

### • Achievement

By using the app consistently, Sneha improves her productivity, completes tasks on time, and achieves better academic results.

## 6. Challenges and Pain Points

### Challenges

- Managing multiple assignments and projects simultaneously.
- Maintaining consistency in study habits.
- Balancing academics with personal activities.
- Planning studies effectively before examinations.

### Pain Points

- Procrastination during self-study sessions.
- Missing assignment deadlines.
- Feeling overwhelmed during exam preparation.
- Lack of a structured study plan.
- Difficulty deciding what topic to study next.

## TASK 2: USER JOURNEY MAP

### Product: Samsung AI Family Hub Smart Refrigerator

#### Product Overview

The Samsung AI Family Hub Smart Refrigerator is an advanced smart appliance that helps users manage food storage, monitor groceries, receive expiration-date alerts, and access AI-powered recommendations. It provides convenience, connectivity, and smart home integration for modern households.

#### User Journey Map

| Stage         | User Action                   | Thoughts               | Emotion    | Pain Point                     |
|---------------|-------------------------------|------------------------|------------|--------------------------------|
| Awareness     | Sees advertisement            | "Looks interesting"    | Curious    | Doesn't know features          |
| Research      | Reads reviews                 | "Is it worth buying?"  | Interested | High price                     |
| Purchase      | Buys refrigerator             | "Hope it's useful"     | Excited    | Expensive investment           |
| Setup         | Connects Wi-Fi and app        | "Setup should be easy" | Confused   | Technical process              |
| Daily Use     | Uses smart features           | "This saves time"      | Happy      | Learning all features          |
| Long-Term Use | Uses AI suggestions regularly | "Very convenient"      | Satisfied  | Occasional connectivity issues |

## Key User Insights

### User Goals

- Reduce food waste.
- Manage groceries efficiently.
- Save time in meal planning.
- Use smart home technology effectively.

### User Expectations

- Easy setup and installation.
- Accurate AI recommendations.
- User-friendly interface.
- Reliable performance.

### Main Pain Points

- High purchase cost.
- Complex setup process.
- Difficulty understanding advanced features.
- Occasional connectivity issues.

### Improvement Opportunities

- Better onboarding tutorials.
- More personalized AI recommendations.
- Simplified user interface.
- Enhanced customer support services.
